

# LOGISTICS SERVICES

## 7Tao Logistics services:

Key Characteristics offered by the 7tAO Logistics partnership include:

**Transportation:** Arranging for the movement of goods using various modes, such as road, rail, air, and ocean freight, to get products from their point of origin to their destination.

**Warehousing & Storage:** Providing strategically planned warehousing systems for the safe and secure storage of goods, often integrated with other services like inventory management.

**Inventory Management:** Professional solutions for managing stock levels, ensuring the right amount of product is available at the right time.

**Order Fulfillment:** The process of picking, packing, and preparing orders for shipment, including services for e-commerce businesses.

**Distribution:** Managing the process of delivering goods to their final points of consumption, whether to businesses or end consumers.

## 7Tao Specialist Logistics services:

Key Specialist characteristics offered by the 7tAO Logistics partnership include:

### Freight Forwarding:

Handling the logistics of international shipping by coordinating with global partners and managing complex overseas freight processes.

### Customs Brokerage:

Facilitating the import and export of goods by managing customs clearance, documentation, and compliance.

### E-commerce Logistics:

Providing solutions tailored for online retailers, including last-mile delivery and dedicated customer support.

### Specialist Services:

Offering expertise in moving specific types of cargo, such as large project cargo, high-value furniture, art, and temperature-sensitive goods (cold chain).

### Third-Party Logistics (3PL) & Fourth-Party Logistics (4PL):

Outsourcing logistics operations to external providers (3PL), or engaging a higher-level integrator that manages multiple logistics providers and the overall supply chain strategy (4PL).
